MacKinnon R, Michels R: The role of the telephone in the psychiatric interview. Psychiatry 33:82-93, 1970

AFTERWORD

INDEX

Page numbers printed in boldface type refer to tables or figures.

Abandonment, 333, 366
Abreactive treatment, 316
Abstractness, in psychotic patient, 431–432
Abuse
alcohol. See Alcoholism
borderline patient history of accounts of, 339, 340
management during interview, 348–349
chronic trauma from, 317
drug. See Substance abuse
management during interview, 348–349
in masochism, 206, 209, 210, 212, 215, 220
neurosis related to, 86
sexual. See Sexual abuse
Academic history, in psychiatric examination
adulthood, 54
childhood, 52
Acceptance
of antisocial patient, 375
lack of
in histrionic patient, 153–156, 162
in paranoid patient, 403
Accommodation, in masochism, 207, 208, 217, 218, 220
Achievement
fear of retaliation for, depression and, 244, 261
need for, in narcissistic patient, 178–179, 187, 190, 191
Acting in, resistance patterns of, 25
Acting out. See also Fantasies
by antisocial patient, 376–377, 383
definition of, 22
resistance patterns of, 22–26
transference and, 22
Action, demands for, by paranoid patient, 408–410
Acute stress disorder, 316, 321
Addiction.
See Alcoholism; Substance abuse
ADHD (attention-deficit/hyperactivity disorder), antisocial personality disorder risks with, 354–355, 366
Adolescence
antisocial behavior during, 358, 365
borderline patient characteristics during, 339–340
interview strategies for, 539
narcissism changes during, 197
paranoid sexual development during, 403
psychiatric examination of, 52
psychosexual history during, 52–53
Adulthood history, psychiatric examination of, 54–56
Advocacy, patient, as interviewer role, 35–36
Affect
in antisocial patient, 358–361
in borderline patient, instability of, 328–330
cognitive impairment impact on, 464, 472
depression and, 233–234
display of, as resistance, 21–22, 163
as interview data, 8–9
in psychotic patient
acute, 425–427
nonacute, 428–430
Affection
countertransference of, 29
lack of
in histrionic patient, 153–156
in obsessive-compulsive patient, 118, 120
transference of, 12
Affective spectrum disorder, masochism vs., 217
Affect storms, 330
Age/age spectrum
antisocial behavior and, 358
interview strategies based on, 538–541
in transference dynamics, 12, 15
Aggression
in antisocial patient, 361
in borderline patient, 327, 330
management during interview, 343, 347–348
in depressed patient
concealment of, 259–260
displacement of, 249–251
paranoid patient identification with, 402
in psychotic patient, 434
"Agitated depression," 239
Agitation
cognitive impairment related to, 462, 464, 467
emergency management of, 486, 495–497
unwillingness and, 501–502
hospital psychiatric consultation for, 509–510
in psychotic patient
acute, 426–427, 437, 442
as positive symptom, 421, 423–424
Agoraphobia, 282, 305
with panic attacks, 282–283
phobia vs., 287–288
Alcoholism
in antisocial patient, 365–366
emergencies related to, 486, 495
in schizophrenic patient, 435
Alliance building
conflict of loyalty and, 537–538
in hospitalized patient interview, 512–514
mixed, 518
Ally, as interviewer role, 35–36
Altruism, masochism vs., 216, 220
Alzheimer's dementia
clinical presentation of, 465–466, 476
interview management for, 467–477
psychopathology of, 465
Ambivalence
in paranoid patient, 395
in patient, 8–9
Anal preoccupation, in paranoid patient, 393
Anal retentiveness, 111
Anamnesis, 39.
See also History taking
Ancillary treatment, for psychotic patient, 445–446
Andreasen, N. C., 316
Anger. See also Rage
in antisocial patient, 368
management during interview, 374–375
in borderline patient, 329, 338, 344, 345
depression and, 234, 245–246, 266, 268
countertransference and, 278–279
direct interpretation of, 272
transference and, 277
in histrionic patient, 168, 175
in masochistic patient, 221–223, 225–226
in obsessive-compulsive patient, 119, 122, 133
in paranoid patient, 385, 387, 391, 394
management during interview, 404–405, 413
transference of, 417
patient's, during interview, 75–76
with note taking, 557
with telephone interruptions, 567, 571
in psychotic patient, 444
telephone communication and, 562–563
Anhedonia, in psychotic patient, 425
Anniversary depressions, 242
Anonymity, 64
Anthropology, cultural, 521–522
Anticipatory anxiety, 89–90
Antidepressants
delirium related to, 462–463
for depression, effectiveness of, 229–232, 268–269, 280
tricyclic, for panic disorder, 293
Antipsychotic agents
for cognitively impaired patient, 475
delirium related to, 462
for schizophrenia, 422, 423
Antisocial behavior
goals of, 355, 357–358
management during interview, 369–378
patterns of, 362–363
Antisocial patient, 353–383
countertransference and, 380–383
defense mechanisms of, 363–366
descriptive disorders of, 353–355
developmental psychodynamics of, 366–368
diagnosis of, 353–354, 355
differential, 368–369
interview management for, 369–378
anger and, 374–375
clarification and confrontation, 373–374
closing phase, 378
interpretation role in, 377–378
opening phase, 369–371
problem exploration, 371–377
withholding and secrecy, 371–373
narcissism vs., 188, 192
psychopathology of, 353–366
behavioral goals in, 355, 357–358
characteristic traits, 353–355
clinical features, 358–366
transference and, 377, 379–380
treatment expectations of, 371
Antisocial personality disorder
characteristic traits of, 353–354, 358–366
developmental psychodynamics of, 366–368
diagnostic challenges of, 368–369
diagnostic criteria for, 353–354, 355
interview management for, 369–378
transference/
countertransference and, 377, 379–383
See also Antisocial patient
Anxiety
anticipatory, 89–90
in antisocial patient, 358–360
defenses against, 363–364
in clinician, 9
with paranoid patient, 413–414
Anxiety (continued)
depression and, 233–234
as emergency, 483–484
interview management for, 494
somatic problems related to, 486
telephone calls for, 481–482, 573
fear vs., 281
in histrionic patient, 159, 163–164
recognizing signs of, 170–171
in hospitalized patient, 506, 509
intolerance of
in anxiety disorder patient, 290
in traumatized patient, 317
neurotic, 281–282
in neurotic behaviors, 88–91
note taking as refuge for, 553
in obsessive-compulsive patient, 111
pathological, 281
in patient, 6, 9, 68
with inexperienced interviewer, 26
in psychodynamics, 84
in psychosomatic patient, 453, 454, 456
rejection-related, in borderline patient, 333
separation, 282, 294, 295, 301
signal, 90, 282
symptoms of, 299–303
changes in, 303
exploring, 299–302
identification as, 303
initial episode of, 302
interpretation of, 310–311
panic attack, 293
phobia, 283–285
physiological, 302–303
telephone communication and, 563
Anxiety disorders, 281–313
common theme of, 282
countertransference and, 312–313
developmental psychodynamics of, 282, 294–297
Freud’s theory of, 281, 282, 292
interview management for, 297–307
of avoidance, 299, 303–307
early cooperation, 298–299
initial dynamics, 297–298, 494
symptom exploration, 299–303
patient education on, 308–309
psychopathology of, 283–294
panic disorder, 292–294
phobia, 283–292
posttraumatic stress disorder, 317
taxonomy of, 281–282
treatment of, 307–312
goals for, 290
interpretation role in, 310–311
medications, 304–305, 309–310
patient education, 308–309
patient’s search for, 304–307
reassurance, 307–308
Apathy, in psychosomatic patient, 425, 433
Appointment telephone calls for setting, 560–561
time changes for, as resistance, 22–23
Arrogance, in narcissistic patient, 178, 182, 183, 201
As-if personality, in borderline patient, 326
Assaultive patient, emergency management of, 496–497
unwillingness and, 501–502
Assertiveness anxiety disorders and, 286, 300
in psychosomatic patient, 434
Attachment borderline patient limitations for, 339
in masochism, 206
object relations model of, 102
in paranoid patient, 390, 391, 392, 396, 402
Attention
lack of, cognitive impairment leading to, 462, 467, 470
mental status examination of, 473
to patient, 532
note taking vs., 553
Attention-deficit/hyperactivity disorder (ADHD), antisocial personality disorder risks with, 354-355, 366
Attention seeking
in borderline patient, 329-330
in histrionic patient, 142, 149
narcissism vs., 158
Attitudes
countertransference significance of, 30
of interviewer
with cognitively impaired patient, 469
psychosomatic patient and, 458
transference of, 11, 13
Atypical depression, 237-238, 239
Auchincloss, E. L., 395
Audio tapes, of psychiatric interview, 554-555
Authority, fear of, in obsessive-compulsive patient, 114-115
issues involved in, 115-117
Authority figure, clinician as, 6, 27, 175
Avoidance
phobic patient use of, 283, 285-286, 289
developmental psychodynamics of, 294-297
effective mechanisms of, 289-292
interpretation of, 310-311
management during interview, 299, 303-307
of reality, in paranoid patient, 394
Axis I disorders, psychosomatic complaints vs., 448, 450, 458
Behavior
antisocial
goals of, 355, 357-358
management during interview, 369-378
patterns of, 362-363
bully, childhood fear of, 296-297
childlike
in histrionic patient, 137, 141-142, 148, 153
in neurotic psychopathology, 83-84
counterphobic, in anxiety disorder patient, 291
“courting,” 11
depression and, 235-236
disorders of, patient data on, 9
“ego-alien,” 91-92
impulsive. See Impulsive behavior
mental functioning and, 100-101
neurotic. See also Neuroses
nature of, 87-88
nonverbal
of histrionic patient, 160-161, 171
as resistance, 25
in psychodynamics, 79
regulatory principles of, 82-83
in psychotic patient acute, 423-425
chronic, 433
management during interview, 438-439
ritualized
immaturity related to, 83
in obsessive-compulsive patient, 111-112, 132
as resistance, 25
seductive
countertransference and, 31
in histrionic patient, 141, 148, 154, 157
management during interview, 160-162
as resistance, 24
Behavior (continued)

self-defeating
of cognitively impaired patient, 467, 471
in masochism, 207, 223–224
sexual. See Sexual behavior unconscious.
See Unconscious behavior

Behavior patterns
of acting out, 22–26
countertransference significance of, 30
limit setting for, 39, 413, 439
Being loved, delusions of, 399–400
Bereavement. See Grief reaction
Betrayal
paranoid patient preoccupation with, 385, 388, 390
patient’s fear of, 6, 9, 68
Bill defaults, as resistance, 23
Biological theories, of depression, 241
Biopsychosocial evaluation, of psychosomatic patient, 456, 458
Bipolar II disorder, in borderline patient, 337
Bipolar spectrum disorder
borderline patient and, 327, 336
in depression, 229
medication for, 422
narcissism vs., 192–193
psychosis related to, 422, 424, 425, 435
Bisexuality, 542
Body language, of histrionic patient, 160–161, 171
Borderline patient, 325–352
adolescence and, 339–340
classification terms for, 325
clinical description of, 326
countertransference and, 351–352
defense mechanisms in, 326–327
devaluation and, 325, 330, 332, 344
narcissistic vs., 337
of therapist, 350–351
developmental psychodynamics of, 337–340
diagnosis of, 327, 327–328
differential, 336–337
histrionic personality disorder vs., 157–158
interview management for, 341–349
early confrontations, 344–349
exploring presenting issues, 341–344
masochism vs., 216
narcissism vs., 179, 192
psychopathology of, 328–337
affectional instability, 328–330
characteristics of, 325, 328–336, 352
comorbidities in, 336–337
dissociation, 334, 335–336
identity disturbances, 332–333
impulsivity, 333–334
paranoid ideation, 335
rejection sensitivity, 333
self-mutilation, 334–335
sexuality, 331–332
suicidality, 334
unstable interpersonal relationships, 330–331, 348
syndrome characteristics of, 325, 349
treatment difficulties with, 352
Borderline personality disorder
characteristic traits of, 326–327, 352
developmental psychodynamics of, 337–340
diagnostic challenges of, 336–337
diagnostic criteria for, 327, 327–328
interview management for, 341–349
transference/
countertransference and, 349–352
psychopathology of, 328–337.

Boredom
in clinician, with depressed patient, 279
in histrionic patient, 142
in interviewer, 532
Brain imaging, psychodynamic applications of, 10
Brain syndromes
alcoholic intoxication as, 251, 486, 495
confusion related to, 485
organic, psychotic vs. nonpsychotic, 94, 422
Bribe, fee as, 62
Bully behavior, childhood fear of, 296–297
Businesslike approach, note taking and, 553
"Cancer phobia," 283
Capacity evaluation, of hospitalized patient, 517–518
Cardiac bypass surgery, psychodynamic factors of, 506–508
Catatonic patient, 405
Cellular phones, 572, 577–579
Censoring, as resistance, 19.
See also Concealment
Chance meetings, outside the interview, 63–64
Character, 10, 110.
See also Personality entries
interpersonal problems related to, 486–487
in hospitalized patients, 509–510
masochism vs., 216–217
neurotic symptoms and, 91–93
phobic traits basic to, 286
psychic reality related to, 100–101
psychotic, 326
Charm/charisma
in antisocial patient, 361, 363, 366
management during interview, 369–370
in histrionic patient, 137, 141–142, 148, 154, 158
in narcissistic patient, 180
Cheating, by antisocial patient, 362
Chemical addiction.
See Substance abuse
Chemical basis, of depression, 272
Chemical sensitivities, in psychosomatic patient, 448–449
Chief complaint, 44–45
of antisocial patient, 371
history of present illness, 45
Child–caretaker relationship, 84, 193, 367
Childhood
danger perception during, 88–89
anxiety related to, 295–297
depression related to, 251–253
discipline during, psychiatric examination of, 50–51
fantasies related to, 86
harm avoidance during, 294–297
narcissism changes during, 195–197
object relations model of, 101–102
paranoid-schizoid development period of, 401–403
perception during mental functioning and, 100
psychological conflict related to, 88–89
psychosis situated in, 94
risk taking tendencies in, 94
separation anxiety situated in, 282, 294, 295, 301
trauma during memories of, 86
panic disorder related to, 297
Childhood history, psychiatric examination of
early, 49–51
later, 52
middle, 51–52
Childlike behavior
in histrionic patient, 137, 141–142, 148, 153
in neurotic psychopathology, 83–84

Childrearing.
See Parent–child relationship
